*Report based on a lecture given at the “Studiedag Mouterij en Brouwerij”,  
Hogeschool Gent, Gent, Belgium, 7 December 2007*

### ABSTRACT

Within the framework of traceability, quality and food safety of malting barley, a group of European Maltsters has developed a common audit-system called JOSUA. JOSUA leads to uniformity of supplier-evaluation within the malting industry. It offers clear insight in area's for improvement for the suppliers of malting barley, not only on an individual basis but also in general.
